Phone: +56 9 32 32 74 40 | Email: rodccisal@gmail.com | <https://github.com/rodccisal>

Experience

FullStack Javascript Developer

REST911 Rescate Médico Móvil a Domicilio 24 horas (May 2019 - Present)

Technologies used: React, Meteor, Javascript, MongoDB, Meteor-up, DigitalOcean, Jest, AWS, GatsbyJS

Innovating in the telemedicine field by building products to connect patients with doctors streamlining the process of medical treatment in order to decrease the cost and improving access to healthcare

Head of Front End Development

PropertySimple (Jun 2017 - May 2019)

Technologies used: React, Redux, Apollo Client, GraphQL, Rails, Elasticsearch, Cypress, Jenkins, AWS

PropertySimple uses Artificial Intelligence to create and manage an agent's entire online marketing, lead capture, and follow-up strategy in a powerful yet simple system.

Launched property portal app to showcase agent's properties and to share collections of properties with their clients also launched a real estate agent's app for them to manage all their personal information to be displayed on their personal landing on the property portal, to create facebook ads and to follow-up on leads gathered by ads or organic reach.

Integrated several API with our platform as Close.io, Hubspot, Intercom, Drift Chatbot

Freelancer

(Jan 2017 - May 2019)

Technologies used: React Native

Built and published The Keto Calculator Android app to calculate the number of macronutrients to consume under the ketogenic diet.

<https://play.google.com/store/apps/details?id=com.theketocalculator&hl=en>

Backend Developer

ArchDaily.com (Dec 2016 - Dec 2017)

Technologies used: Ruby on Rails

In charge of maintaining Ruby on Rails app for editors to create content to be published on the main site. I also worked on other several tasks namely creating scripts to crawl main architecture sites and briefly evaluated the opportunity of adopting react for internal apps.

Education

Languages spoken

Spanish (native)

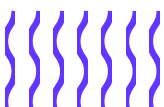

English (C1)

French (A1 and actively learning)

Universidad de Chile

Business School

I did three years of Business School before changing my career path at the beginning of the fourth to fully dedicate myself to web development, product development, and technology
